SERIES 2110 OPTICAL ISOLATORS AND FARADAY ROTATORS IR 1.85-3.4 μm

FastPulse Technology's Optical Isolator product line is designed for today's new laser wavelengths and power levels. Each model has been optimized in the region for lowest absorption. In the past decade numerous advances have made lasers in this region practical for many new applications. The 1.85-3.4 μm range requires several types of Faraday rotator materials. Each material used in this series has the properties needed for isolator design optimization. The polarizer choices likewise are based on the wavelength of interest. It is not possible to list all the possible design options for this region. Please contact us. We will quickly configure our designs for your wavelength of interest.

Isolation values typically exceed 33 dB at the center wavelength. Materials are selected for lowest absorption and scatter. The associated magnets allow most designs to share the 25.4 mm diameter housing profile. Custom Isolators will be quoted and built to order. OEM designs can be optimized to meet size requirements.

FastPulse Technology also offers Series 2115 High Power TEC & Liquid Cooled Optical Isolators for the 1.9-2.1 μm region incorporating our unique 1.0-10 μm broadband ZnSe polarizer design.

See series 2115 isolators for larger aperture 1.9-2.1 μm models.

FastPulse Technology's 2.25 - 3.4 μm region isolators include standardized designs for uncommon wavelengths. Crystal polarizers MP series allow for higher power handling isolators. AP series absorptive polarizers provide low cost option for low power applications. New lasers include models based on Cr and Fe doped II-VI materials such as Cr:ZnSe. These offer researchers many new wavelength choices that are covered by our isolator models.

Isolator Model Product Line

- 2110** IR region 1.85 - 3.5 μm Models. 2 μm Models, 2940 nm, 3390 nm included.
- 2115** Large Aperture and Actively Cooled 1.9 - 2.1 μm Optical Isolators.
- 2117** SS Vacuum compatible 1390 nm & 1550-1650 nm
- 2120** Miniature 1064 nm and 1550 nm Isolator Models
- 2135** TGG models 1064 nm
- 2150** TGG models Low power 633 nm, 670 – 700 nm, 780 – 920 nm
- 21xx** SWIR 1550 nm S/C/L/U bands to 1670nm, Apertures 1.7-8 mm (Series 2110, 2115, 2117, 2120)
